

Project management

To achieve the goals of challenging projects in a given time frame, the calculated costs and the need for quality, we assist in structuring, planning and coordination. We motivate and empower staff to drive forward projects and promote communication, team building and understanding of upcoming tasks.

As a consistent approach across our product assortment, following approaches have proven themselves:

- **Assessment identifying potential**
 - Status quo analysis
 - Representation of the status quo situation with the PM Maturity Model
 - Identification of potential improvements
- **Training / Coaching:**
 - Mediation of methodology
 - Training of PM standards. e.g. PMI
 - Preparation for the Project Management Professional (PMP) certificate
 - PM software training
- **Pilot project:**
 - "Training on the Job" and "Train the Trainer"
 - Application of the mediated methods and tools within a specific project
- **PM process implementation:**
 - Accompanying PM coaching for selected projects
 - Review of the implemented PM processes with a PM Maturity Model

Customer benefit:

- Securing the future - Structured realization of complex tasks
- Cost reduction - By means of efficient PM processes
- Quality improvement - Sustainable use of PM methods
- Time saving - Monitoring of critical paths and early correction
- Adherence to schedules - Clearly defined project phases and milestones
- Qualification - Holistic and sustainable thinking
- Transfer of knowledge - Common base of understanding of projects
